Re: FOIA Request

Dear Sir or Madam:

Pursuant to the Freedom of Information Act (FOIA) (5 U.S.C. § 552), and the U.S. Environmental Protection Agency's (EPA) freedom of information regulations, kindly provide us with the following information regarding the following chemical substance:

Borated reaction product of polybutenyl succinic anhydride with ethylenediamine-piperazine polymer, conforming to EPA Accession No. 17799.

Please provide us with:

- (1) the Toxic Substances Control Act (TSCA) (15 U.S.C. § 2601 *et seq.*) Inventory Reporting forms (Form Cs, premanufacture notifications (PMN), or any other such forms) that were used to report the substance for the TSCA Chemical Substance Inventory (TSCA Inventory);
- (2) a Chemicals in Commerce Information System (CICIS) printout for this substance;
- (3) any associated non-confidential correspondence (or confidential correspondence from which CBI information has been removed) and related documents pertaining to the TSCA Inventory listing for this substance; and

KELLER AND HECKMAN LLP

EPA National Freedom of Information Officer

August 17, 2015

Page 2

- (4) any non-confidential submissions or records (or confidential submissions or records from which CBI information has been removed) pursuant to any update of the TSCA Inventory and related documents pertaining to the TSCA Inventory update for this substance (including, but not limited to, reports submitted under the Inventory Update Reporting Rule and Chemical Data Reporting Rule under section 8 of TSCA).

We would also be interested in learning the number of companies, if any, who reported this substance for the Inventory or for the Inventory Update but who claimed their identity as confidential.

With respect to item (1), please note that we are requesting copies of the *original* TSCA Inventory form(s) reporting this substance, not, for example, a computer printout indicating receipt of reporting form(s). Based on our review of the public TSCA Chemical Substances Inventory, we believe the Inventory Reporting Form Number for this substance is 30722607, but please provide us with all of the results of your search in response to this request.

We agree to pay reasonable search and reproduction costs for this information. **This is a relatively urgent request and a quick response would be greatly appreciated.** We would be happy to receive the results by email, fax or by arranging for a messenger to pick it up if this would expedite your response.

If you have any questions concerning this request, please do not hesitate to contact me at the number listed above. Thank you in advance for your assistance.

Sincerely,

Adrienne M. Timmel
